Academic Program and Course Description Guide

2026 2025

:the introduction

The educational program is a coordinated and organized package of courses that includes procedures and experiences organized into course vocabulary. Its main qualified to purpose is to build and refine the skills of graduates, making them meet the requirements of the labor market. It is reviewed and evaluated annually through internal or external audit procedures and programs, such as the external .examiner program

the program's The academic program description provides a brief summary of main features and courses, indicating the skills that students are working to acquire based on the academic program's objectives. The importance of this description is ditation, evident in that it represents the cornerstone for obtaining program accre and it is written by the teaching staff under the supervision of the scientific .committees in the academic departments

This second edition of the guide includes a description of the academic program hs of the previous guide in light of the after updating the vocabulary and paragra developments and changes in the educational system in Iraq, which included a description of the academic program in its traditional form (annual, semester m description system), as well as adopting the generalized academic progra with 2024/25/1 dated 4230 / according to the Department of Studies' letter TJD .adopt the Bologna Process as the basis for their work that programs to regard

In this regard, we cannot but emphasize the importance of writing descriptions f academic programs and courses to ensure the smooth running of the educational o .process

:Concepts and terminology

academic program description provides a **Academic Program Description: The** including an accurate ,concise summary of its vision, mission, and objectives description of the targeted learning outcomes according to specific learning .strategies

This provides a concise summary of the course's key features **:Course description** t has made the and expected learning outcomes, demonstrating whether the studen most of the available learning opportunities. It is derived from the program .description

An ambitious vision for the future of the academic program to **:Program Vision** .ambe a sophisticated, inspiring, motivating, realistic and applicable progr

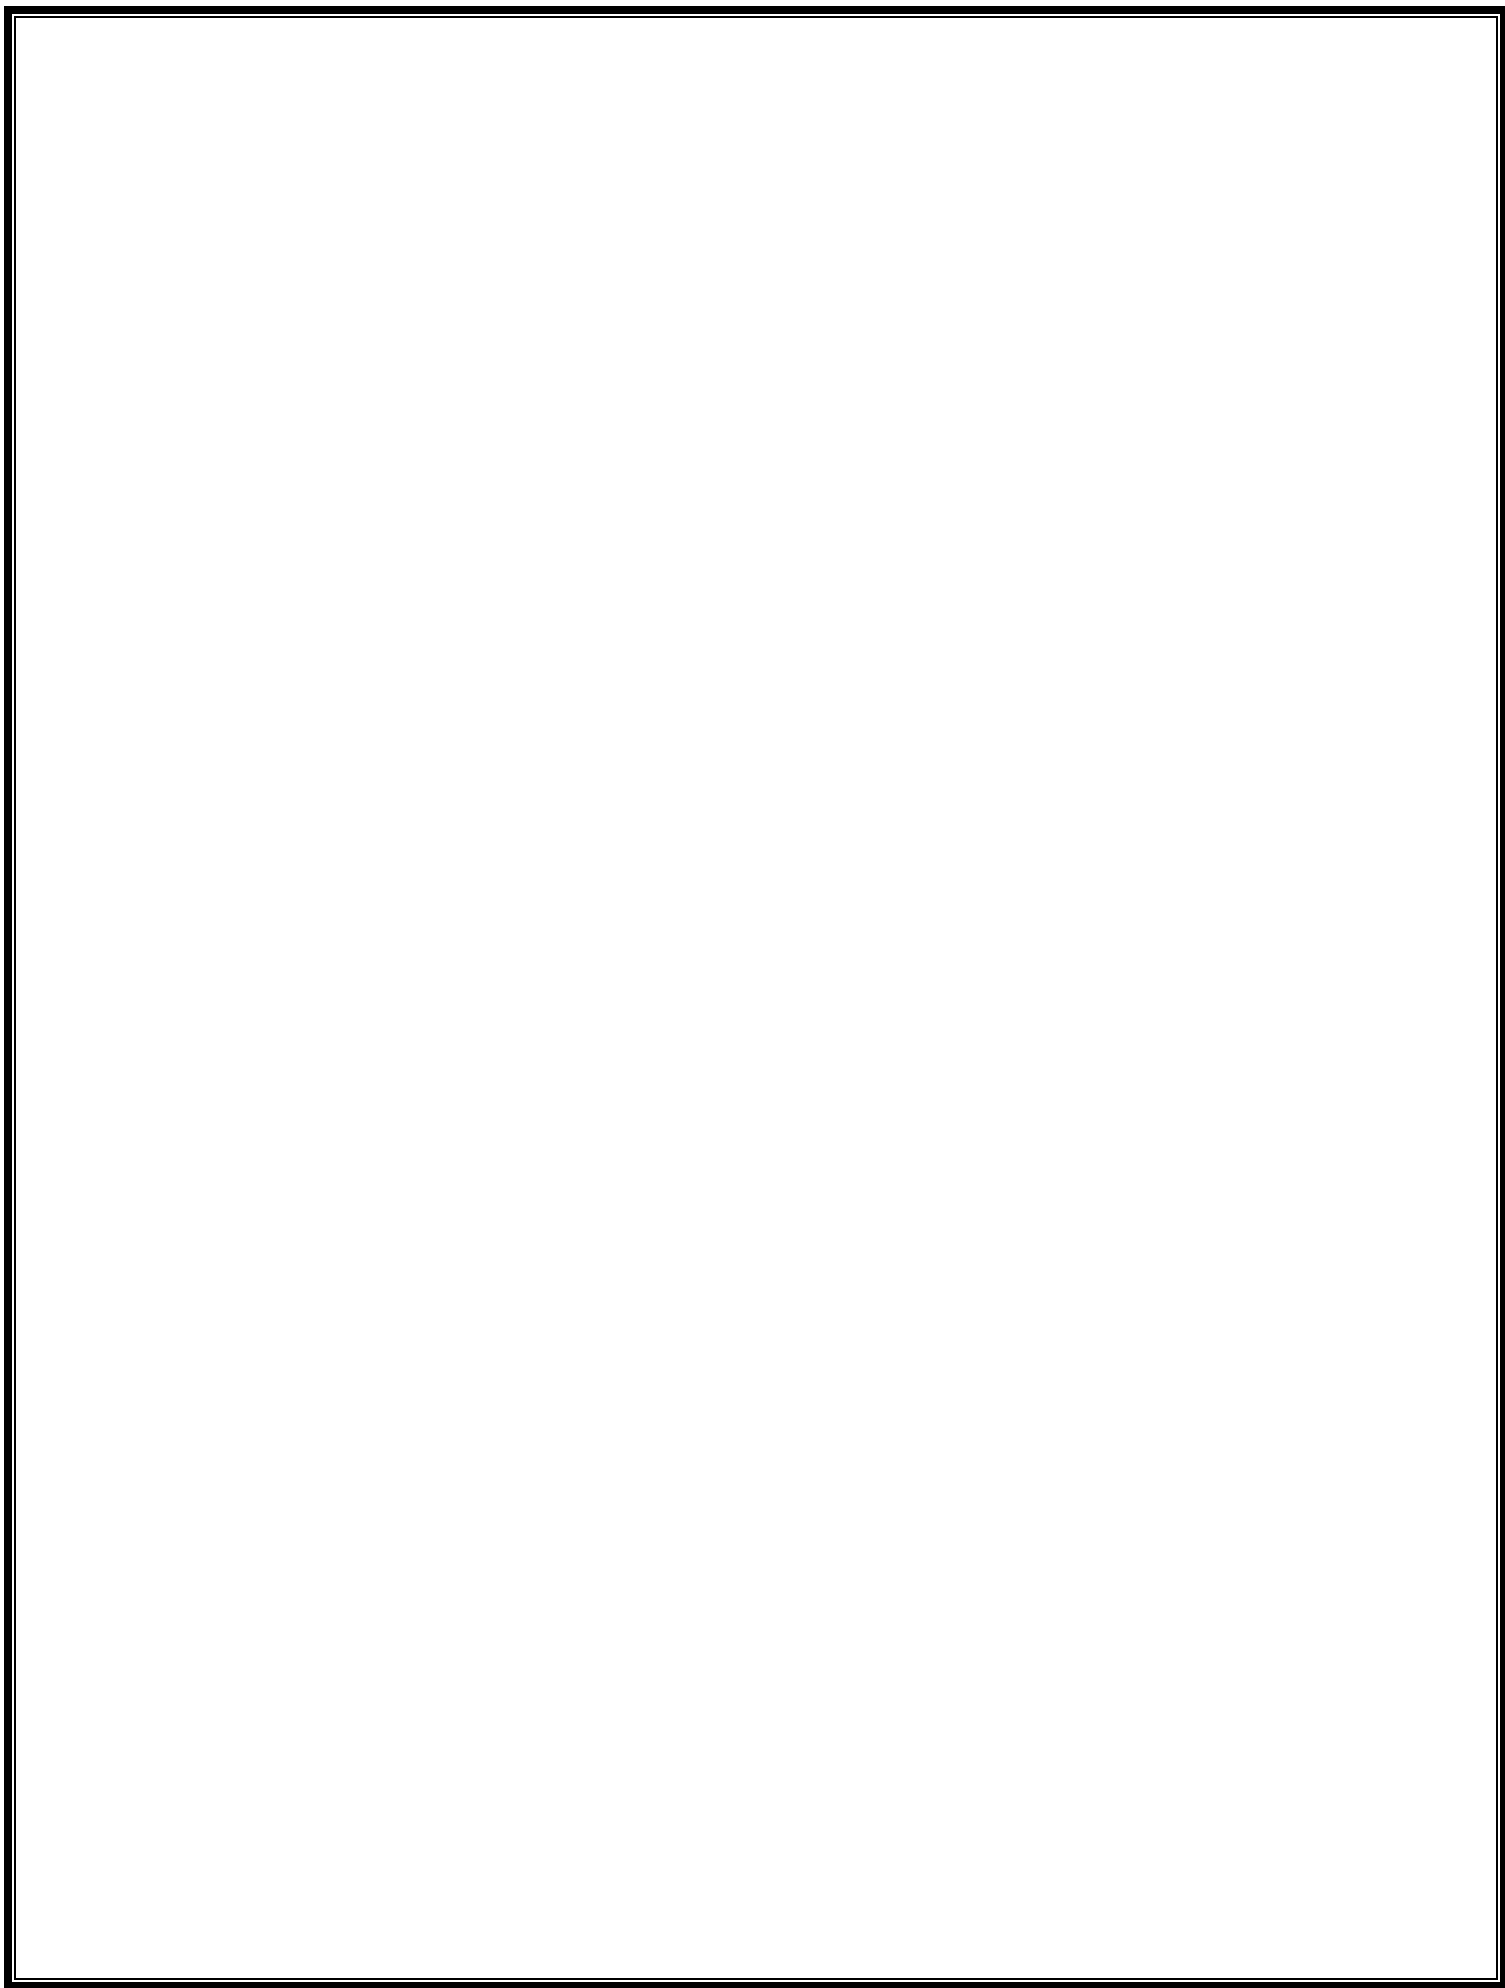

Briefly outlines the goals and activities necessary to achieve **:Program Mission** .them, and identifies the program's development paths and directions

These are statements that describe what the academic **:Program objectives** hin a specific time period and are measurable and program intends to achieve wit .observable

All courses/study materials included in the academic **:Curriculum structure** program according to the approved learning system (semester, annual, Bologna sity, College and Scientific Department), track), whether required (Ministry, Univer .with the number of study units

A consistent set of knowledge, skills, and values acquired by **:Learning outcomes** the student after the successful completion of the academic program. The learning ource must be defined in a way that achieves the program's outcomes for each c .objectives

are the strategies used by faculty members to **Teaching and learning strategies** enhance student teaching and learning; they are plans followed to achieve learning goals, they describe all classroom and extracurricular objectives. In other words, activities aimed at achieving the program's learning outcomes

University Name: - Wasit University

College/Institute: College of Administration and Economics

Scientific Department: Economics Department

Name of the academic or professional program: PhD in Public Economics

Final degree title: PhD in Economics

The academic system: Courses
