Academic program and course description guide

2026-2025

Introduction:

The educational program is a coordinated and organized package of courses that includes procedures and experiences organized in the form of study vocabulary. The primary purpose of this program is to build and refine the skills of graduates, making them qualified to meet the labor market requirements. It is reviewed and evaluated annually through internal or external audit procedures and programs, such as the external examiner program.

The description of the academic program provides a summary of the program's main features and decisions, indicating the skills being worked on to give students based on the program's objectives. This description is important because it represents the cornerstone of obtaining program accreditation. It is co-written by teaching staff under the supervision of scientific committees in scientific departments.

This guide, in its second version, includes a description of the academic program after updating the vocabulary and paragraphs of the previous manual in light of the latest developments and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly) as well as the adoption of the description of the educational program circulated under

the letter of the Department of studies numbered 3/2906 on 3/5/2023 concerning programs that adopt the Bologna track mainly For her work. In this field, we can only emphasize the importance of writing the description of academic programs and curricula to ensure the proper functioning of the educational process.

Concepts and terminology:

Description of the academic program: The description summarizes its vision, mission, and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course description: This summarizes the course's most important characteristics and the learning outcomes expected from the student, proving whether he has made the most of the available learning opportunities. It is derived from the program description.

Program Vision: the ambitious image of the academic program's future as an advanced, inspiring, motivating, realistic, and applicable program.

It concisely defines the goals and activities necessary to achieve them and the program's development paths and directions.

Program objectives are phrases that describe what the academic program intends to achieve within a specific period. They are measurable and observable.

Curriculum structure :all courses/subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna track), whether it is a requirement (Ministry, University, College, and Scientific Department), with the number of academic units.

Learning outcomes are compatible sets of knowledge, skills, and values acquired by the student after the successful completion of the academic

program. The learning outcomes for each course must be determined to achieve the program's objectives.

Teaching and learning strategies :These are the strategies used by faculty members to develop teaching–learning students and are plans that are followed to reach learning goals. They describe all classroom and extracurricular activities to achieve the program's learning outcomes.

Academic Program Description Form

University Name: Wasit

Faculty/Institute: College of Administration and Economics

Scientific Department: Business Administration

Academic or Professional Program Name: Bachelor in Business Administration

Final Certificate Name: Bachelor in Business Administration.....

1. .1 **Program Vision**

Excellence in performance to achieve leadership in university circles to be one of the scientific and research beacons for the advancement of society.

1. .2 **Program message**

The program's mission is to " achieve excellence in higher education and scientific research to serve the community, which contributes to improving the administrative level of the Department's graduates and meeting the labor market requirements.

To achieve this mission, an educational and research environment must be created that helps:

1. -1discovering different knowledge through scientific research and excellence .
2. -2efficient transfer of knowledge to others through the development of educational means and methods .
3. -3development of research capabilities, leadership capabilities, and decision-making .
4. -4applying the acquired knowledge and skills to suit and serve the community's needs .

1. .3 **Program objectives**

The objectives of the program are as follows:

1. -1Preparing highly qualified human competencies in the field of Business Administration .
2. -2The department should be a source of information and expertise, enabling it to provide consultations and expertise to government institutions and civil society organizations to advance Community Development .
3. 3Develop knowledge through scientific research and studies in administrative fields and encourage researchers to publish research that meets the requirements of research standards at the global level .
4. -4Preparing students with essential preparation to enable them to work professionally and academically after graduation in a way that serves the labor market requirements .

5. -5creating ambition and desire among students to develop the job and management in general and overcome their weaknesses .
6. -6encouraging motivation to prepare research that serves the community and publish it in the college journal or other journals .
7. -7employ computers and databases in administrative and functional activity .
8. -8holding conferences, seminars, and courses in various administrative fields .
9. -9contribute to continuing education courses to train, develop, and raise the efficiency of the performance of state employees and other sectors, as well as provide management consulting to the relevant authorities .

1. .4Curricula accreditation

The program is working very hard and diligently to obtain program accreditation, God willing, in the coming days, the requirements of this program will be met to raise the rating of our academic program.

1. .5Other external influences

There is currently no .The update will be made as soon as the software accreditation is obtained.

1. .6Program structure

* Observations	Percentage ratio	Academic unit	Number of courses	Program structure
*The requirements listed in this table are the total number of students' units and courses in the four stages combined .Each course is detailed in paragraph 7				Enterprise requirements
				College requirements
	*2.45	142	58	Department requirements
		hours 2	hours 2	Summer training

(program description).				
The Department's courses are introductory in general.	This percentage * was calculated by dividing the number of units by the .number of courses			Other

.Notes may include whether the course is essential or optional *

1. 8 Expected learning outcomes of the program

Provide knowledge and understanding of the stages of analysis, planning, control, and administrative decision-making Provide knowledge and understanding of the methods of preparing human resources Develop knowledge and understanding of performance evaluation methods Show leadership and initiative	Stages of administrative work
Skills	
and planning skills in financial management . And planning skills related to organizational behavior and organization . Related to the development of research capabilities, leadership capabilities, and decision-making . Skills for the development of human resources capabilities and knowledge management .	Skills for administrative work
Values	
We have advanced management skills . Improve thinking skills and creativity . Improve decision-making skills . The ability to self-analyze .	The values acquired by the student after the successful completion of the academic program

1. 9 Teaching and learning strategies

Explanation and explanation The method of the lecture . The method of self-learning . To guide students to some websites to benefit from them . Conduct training and activities in the classroom . They hold research seminars through which modern technologies and their uses are carried out .
--

1. 10 Evaluation methods

The process of submitting activities and reports . in research seminars (reports and studies) Take practical tests .

Take theoretical tests .

Professional development

Mentoring new faculty members

At the level of the institution and the scientific department, the following were used to orient the New, visiting, full-time, and part-time teaching staff:

1. (1 Attend workshops, seminars, and courses the institution's advanced staff holds .
2. (2registration in marketing programs for teachers such as (Google Scholar, Research Gate, Scopus, and WoS) .
3. (3develop their job skills and encourage them to propose seminars and workshops that they hold themselves .
4. (4direct communication with them and inform them of all regulatory procedures and acts issued by the institution .

Professional development of faculty members

1. (1too many duties that require external information
2. (2more practical applications

1. .12Acceptance criterion

1. (1Central acceptance
2. (2scientific interview
3. (3medical examination
4. (4the graduate of the literary and scientific branches is accepted at a rate of 5% of the first commercial branch in Iraq outside the admission plan of the Department .

1. .13The most important sources of information about the program

- (1sources approved by the University (sectoral committee)
- (2external sources and various books in Arabic and English
- (3internet sources
- (4the language of study approved by the sectoral committee is Arabic and English

1. .14Program development plan

1. (1cognitive development of the curriculum vocabulary to comply with the labor market requirements . This means developing and updating the curriculum from a description, goals, learning outcomes, books, and references .
2. (2developing and updating the quality of the study plan. This is done by updating the study program's vision, mission, objectives, learning outcomes, teaching methods, measurement, and evaluation .

Course Description Form

1. Course Name:	
Negotiation management	
2. Course Code:	
3. Semester / Year:	
Second / 2026	
4. Description Preparation Date:	
2026/2/1	
5. Available Attendance Forms:	
My presence	
6. Number of Credit Hours (Total) / Number of Units (Total)	
30	
7. Course administrator's name (mention all, if more than one name)	
Name: Qasim Haboob Abbas Email: qabbas@uowasit.edu.iq	
8. Course Objectives	
Course Objective	• The student gets to know the concept of negotiation management and its importance. • Introducing the student to the characteristics, levels and types of negotiation management - Introducing the principles and behaviors of an effective negotiator. • Definition of how to build a negotiating team and the most important strategies and tactics negotiating management.....
9. Teaching and Learning Strategies	
Strategy	Do not underestimate the party you are negotiating with. Do not rush to make a decision and take time to think. He should listen more than he speaks, and when speaking he should not say anything of value during the preliminary negotiations. The negotiator must have an elegant, dignified, and respectful appearance in all negotiating processes and in all official sessions

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
the first	2		Negotiation concept Negotiation characteristics	My presence	Quiz + Participation
the second	2		Negotiation elements Negotiation characteristics Negotiation elements	My presence	Quiz + Participation
the third	2		Features of negotiation Negotiation levels Types of negotiation	My presence	Quiz + Participation
The fourth	2		Principles of negotiation Rational principles By negotiator	My presence	Quiz + Participation
Fifth	2		Related principles Work system Related principles By the behavior of negotiator himself	My presence	Quiz + Participation
Sixth	2		Related principles Work with tactics Principles related negotiation skills	My presence	Quiz + Participation
Seventh	2		Negotiation steps Building the negotiating team Negotiation topics	My presence	Quiz + Participation
eight	2		Negotiation tables Agendas Tables of possible outcomes	My presence	Quiz + Participation
Ninth	2		Effective negotiator And his behaviors	My presence	Quiz + Participation
The tenth	2		Building the negotiating team Individual versus Team Physical preparation the negotiator	My presence	Quiz + Participation
eleventh	2		The importance of the negotiating team Negotiating roles	My presence	Quiz + Participation
twelveth	2		Limits of the negotiating team	My presence	Quiz +

			Formation of negotiating team		Participation
Thirteenth	2		Size of the negotiating team negotiation skills Stages of successful administrative negotiation	My presence	Quiz + Participation
fourteenth	2		Negotiation strategies and tactics Types of strategies Competitive negotiation strategy cooperative negotiation strategy	My presence	Quiz + Participation
Fifteenth	2		Collaborative Negotiation Strategy Cooperation-Competition Strategy Negotiation Tactics	My presence	Quiz + Participation

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

40 degree theory

degrees 10	degrees 10	degrees 20
Second month exam	First month exam	Daily exams, assignments, and assigned tasks + attendance

8. Course Objectives	
Objectives of the course	- Teaching students basic scientific concepts in the field of scientific research, the most important of which is science knowledge, thinking, research, methodology, and scientific research methodology. - Teaching students sound scientific thinking and how to use sources of information of all kinds. - Introducing students to the most important tools and means used in collecting data and information that help them prepare and write research papers, especially graduation research.
9. Teaching and Learning Strategies	
Strategy	- The strategy of the scientific subject is to pair the theoretical academic lecture inside the hall with the training to conduct some classroom research and other research activities as consecutive classroom assignments. - Reaching students with a mature scientific way of thinking and performance that qualifies them to deal with the field of scientific research and how to perform properly and use the various scientific research tools.

10. Course Structure					
Week:	Hours	The learning outcomes	Unit or Topic Name	Learning Method	Method of Evaluation
first	2	Introducing the general scientific introduction to the scientific material	Introduction to Scientific Research	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
The second one.	2	Identify direct and relevant scientific definitions in the field of scientific research, especially science, knowledge, thinking, methodology, research, and scientific research methodology	Introduction to basic definitions and related definitions in the field of scientific research.	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
Third-	2	Knowledge of the characteristics, qualities and requirements of good scientific research.	The most important qualities and characteristics required in good scientific research	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
4th	2	Knowing the qualities of a successful scientific researcher	The most important qualities and characteristics required in a successful scientific researcher	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
-fifth and	2	scientific research	Definitions, conditions, attributes and sources of obtaining them.	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
6th	2	Formulating scientific research hypotheses	Definitions, Conditions, Attributes, Ingredients and Benefits	Lecture, Examples and Discussions	Questions and discussions for most students with a test

					sometimes
7th	2		First Examination		
Eighth	2	How to organize and write the margins of scientific research	Definitions, Causes and Benefits of Margins in Scientific Research		
IX	2	How to organize and write the margins of scientific research	To know the multiple and different methods of organizing and writing the margins of scientific research, and to determine the latest and best among them for graduation research	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
X	2	How to select scientific research samples	Definitions, Importance, Benefits and Causes	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
Eleventh Eleventh	2	How to select scientific research samples	Types of Samples in Scientific Research	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
XII	2	Identify data and information collection tools	The questionnaire, its definition and types, its advantages and disadvantages	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
Third-	2	Identify data and information collection tools	The interview, its definition, types, advantages and disadvantages	Lecture, Examples and Discussions	Questions and discussions for most students with a test sometimes
4th	2	Identify data and information collection tools	Observation Definition, Types, Advantages and Disadvantages	Lecture, Examples and Discussions	Questions and discussions for most

					students with a test sometimes
Fifteenth	2		Second Examination		
11. Course Evaluation					
Distribution of the score of 100 according to the tasks assigned to the student such as daily preparation, daily, oral, monthly and written examinations and reports Etc. , and are distributed as follows: The degree of pursuit is 40 divided into 20 daily exams and attendance, 10 exams in the first month, 10 exams in the second month					
12. Learning and Teaching Resources					
Required textbooks (methodology if any)			Scientific research and use information sources Prof. Amer Ibrahim Qandilji. The origins and methods scientific research. Prof. Dr. Ribhi Mustafa Alian.

Academic Program and Course

Course Description Form

1. Course Name	
Research Project.	
2. Course Code	
3. Term /Year	
Second / 2026	
4. Date this description was prepared	
15/12/2025	
5. A. Available Attendance Forms	
In-person lectures	
6. Number of study hours (total)/number of units (total)	
Hour 30/2 Units	
7. Name of course administrator (if more than one name is mentioned)	
Name: Eng. Dr. Saad Sakban Salman Email : saadsalman@uowasit.edu	
8. Course Objectives	
Objectives of the course	- Training and teaching students to prepare and write classroom research in practice, with a focus on the titles of individual students' research assigned to them as graduation research. - Teaching and training students on how to prepare and write scientific research papers in its final form, such as the title page, the introductory pages, the introduction, the results and recommendations, the list of sources, and others . - Training students on how to prepare for the discussion from the scientific and psychological side and how to register questions and inquiries and defend their research before the discussion committee.
9. Teaching and Learning Strategies	
Strategy	- The strategy of the scientific subject is that it is a direct practical training of the methods and principles of scientific research that establishes the students' confidence in the importance of scientific research and develops in them the curiosity and scientific readiness for later higher education stages and how to deal with the subject of scientific research - Reaching students with a mature scientific way of thinking

and performance that qualifies them to deal with the field of scientific research and how to perform properly and use the various scientific research tools.

10. Course Structure

Week:	Hours	The learning outcomes	Unit or Topic Name	Learning Method	Method of Evaluation
first	2	Introducing the general scientific introduction to the scientific material	General introduction to scientific research	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
The second one.	2	Introducing the research in its final form	The basic sections that make up the research in its final form	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
Third-	2	How to write it and prepare the research plan or research methodology	Research Problem, Research Importance, Research Objectives, Research Hypotheses, Research Hypothesis	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
4th	2	How to write it and prepare the research plan or research methodology	, research community, research sample, data and information collection tools, research limits, previous studies.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
-fifth and	2	How to prepare and write scientific research	One Title page and introductory pages	Lecture, Examples and	Questions, discussions, and

		sections		Discussions	assigning homework to accomplish what was covered in the lecture.
6th	2	How to prepare and write scientific research sections	Section Three: Introduction to Scientific Research Definition and Conditions and How to Prepare and Write Them.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
7th	2	How to prepare and write scientific research sections	Four Scientific material for research (chapters and detectives) How to collect, sort, analyze and divide.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
Eighth	2		First Examination		
IX	2	How to prepare and write scientific research sections	Section 5: Findings, recommendations and proposals, their conditions and how to prepare and write them.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
X	2	How to prepare and write scientific research sections	Section 6: المصادر والمراجع: What are the conditions of their numbers and organization?	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
Eleventh Eleventh	2	How to prepare and write	Section 7: Appendices in	Lecture, Examples	Questions, discussions,

		scientific research sections	scientific research. Define it, how to mention it, choose it, classify it, and refer to it.	and Discussions	and assigning homework to accomplish what was covered in the lecture.
XII	2	Learn how to review research	The final review of the research in terms of the objective scientific aspect, in terms of the linguistic aspect, and in terms of the formal aspect of the research.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
Third-	2	How to discuss and prepare for research.	The concept of discussion, preparation for it and the skills required to be mastered before the date of discussion.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
4th	2	Research Discussion	Practical training on research discussion.	Lecture, Examples and Discussions	Questions, discussions, and assigning homework to accomplish what was covered in the lecture.
Fifteenth	2		Second Examination		
11. Course Evaluation

Course description form

1. Course name					
Investment portfolio management					
2. Course code					
3. Semester/year					
the second semester 2025-2026					
4. The date this description was prepared					
February 2026					
5. Available forms of attendance					
My presence					
6. Number of study hours (total)/number of units (total)					
45 hours / 3 units					
7. Name of the course administrator (if more than one name is mentioned)					
Mother. Ali Abdul Mineerm Mahdi aabdulmineem@uowasit.edu.iq					
1. .1Course objectives					
○ Introducing the basics of the investment portfolio and related terminology. ○ Reviewing the role of the investment portfolio in business organizations. ○ Identify the role of the investment portfolio in supporting daily operations and decision-making processes ○ Building students' ability to understand the requirements and steps of portfolio management.					Objectives of the study subject
2. Teaching and learning strategies					
. Mixing theoretical and applied lectures with classroom and extracurricular participatory learning by students by focusing primarily on the conceptual framework of the course, taking realistic examples of each of its concepts to reach the learning objectives.					The strategy
3. Course Structure					
Evaluation method	Learning method	Unit or subject name	Required Learning Outcomes	Hours	Week
Participation, daily exams or direct questions	My attendance inside the classroom		Introduction to the basics of investing	3	the first
Participation, daily exams or direct questions	My attendance inside the classroom		The basics of return and risk	3	the second
Participation, daily exams or direct questions	My attendance inside the classroom		Valuation of commo stock	3	the third
Participation, daily exams or direct questions	My attendance inside the classroom		Bond valuation	3	the fourth
Participation, daily exams or direct questions	My attendance inside the classroom		Market efficiency	3	Fifth
Participation, daily exams or direct questions	My attendance inside the classroom		Investment portfolio management	3	sixth

Participation, daily exams or direct questions	My attendance inside the classroom		The rule of diversify the investment portfolio	3	Seventh
Participation, daily exams or direct questions	My attendance inside the classroom		Introduction to efficient capital markets	3	Eighth
Participation, daily exams or direct questions	My attendance inside the classroom		General concepts in the investment portfolio and the foundations of its management	3	Ninth
Participation, daily exams or direct questions	My attendance inside the classroom		The concept of diversification, types and basics of diversification	3	The tenth
Participation, daily exams or direct questions	My attendance inside the classroom		Measuring portfolio return	3	eleventh
Participation, daily exams or direct questions	My attendance inside the classroom		Introduction to efficient capital markets	3	twelfth
Participation, daily exams or direct questions	My attendance inside the classroom		Introduction to international portfolios	3	Thirteenth
Participation, daily exams or direct questions	My attendance inside the classroom		Measuring investment portfolio risk..	3	fourteenth
Participation, daily exams or direct questions	My attendance inside the classroom		Methods of measuring risk	3	Fifteenth

4. .1Course evaluation

Distribution of the grade out of (100) according to the tasks assigned to the student, such as participation, daily, monthly, and quarterly examinations, and preparing scientific reports on information technology.... It is distributed as follows:

-1-The pursuit grade is from (40) divided into 20 marks for the monthly written exams, 10 for the first month's exam and 10 for the second month's exam. 20 marks for the duties assigned to the student such as attendance, writing reports, participation, and daily exams + attendance.

2-The final semester exam score is (60)

5. .5Learning and teaching resources

Nothing	Required textbooks (methodology, if any)
1- Modern Financial Management / Muhammad Ali Ibrahim Al-Amri / 1st Edition 2013	Main references (sources)
Investment Portfolio Management / Adeeb Qasim Shindi / 2020	Recommended supporting books and references (scientific journals, reports....)
	Electronic references, Internet sites

نموذج وصف المقرر

وصف المقرر

السعي الى تقديم اطار فكري وتطبيقي لابرز المحاور الفكرية والممارسات العملية لإدارة الاعمال الدولية التي تزود الطالب بالاطار المعرفي المتكامل المطلوب لتطوير مقدراته الجوهرية وتعزيز راسماله الفكري باستخدام مهارات التحليل والاستنباط العملي المبني على الحالات الدراسية وبالشكل الذي تمكنه من مواكبة التطورات الدولية في بيئة ادارة الاعمال وتنافسيتها.

1. المؤسسة التعليمية	جامعة واسط/ كلية الإدارة والاقتصاد
2. القسم الجامعي / المركز	إدارة الأعمال
3. اسم / رمز المقرر	إدارة الأعمال الدولية
4. البرامج التي يدخل فيها	المرحلة الرابعة- إدارة أعمال
5. أشكال الحضور المتاحة	قاعات دراسية
6. الفصل / السنة	الكورس لثاني
7. عدد الساعات الدراسية (الكلي)	(2) ساعات أسبوعياً
8. تاريخ إعداد هذا الوصف	2025/9/30
9. أهداف المقرر	
يهدف هذا المقرر إلى تزويد الطلبة بنظرة عامة ومعقدة حول المراتبات الفكرية لإدارة الأعمال الدولية وابرز نماذجها المتداولة والمنظمات والاتفاقيات ذات العلاقة بها ، فضلا عن الثقافة والمعرفة وانواعها وشخصيات المفوضين وابرز الاستراتيجيات والتكتيكات التفاوضية فيها ، وخارطة اصحاب المصالح واستراتيجيات الدخول للأسواق الدولية ، كما يهدف المقرر ايضا الى تعريف القارئ بأنشطة او عمليات ادارة الأعمال الدولية من منظور عالمي كإدارة الموارد البشرية والتسويق والعمليات والادارة المالية.	
9- مخرجات المقرر وطرائق التعليم والتعلم والتقييم	
أ- المعرفة والفهم معرفة مفهوم الادارة الدولية معرفة نماذج الادارة الدولية معرفة تطبيقات الادارة الدولية معرفة استراتيجية الادارة الدولية	

	ب - المهارات الخاصة بالموضوع الاطلاع على بعض المصادر في ادارة الاعمال الالكترونية ودراسة مواضيع سابقة (حالات دراسية)
	ج- مهارات التفكير مهارات التفكير الخاصة الادارة الدولية وكيفية تطبيقها
	طرائق التعليم والتعلم
	عرض المحاضرة من قبل استاذة المادة وفسح المجال للطلبة بالمشاركة بالاسئلة والاجابة على الاسئلة التي تطرح عليه
	طرائق التقييم
	المشاركات اليومية الامتحانات الشهرية الالتزام بالحضور د- المهارات العامة والتأهيلية المنقولة (المهارات الاخرى المتعلقة بقابلية التوظيف والتطور الشخصي) زرع الثقة بالنفس لدى الطالب وروح المبادرة والمساهمة في تقديم المساعدة للآخرين

الأسبوع	الساعات	مخرجات التعلم المطلوبة	اسم الوحدة / المساق أو الموضوع	طريقة التعليم	طريقة التقييم
1	2	تحليل مفاهيم إدارة الأعمال الدولية ، والادارة العامة الدولية وشركات الصنف العالمي	المظلة الفكرية والمفاهيمية لإدارة الاعمال الدولية	نظري مع حالات دراسية و مناقشة	مشاركات مع امتحان فصلي
2	2	بيان أهمية إدارة الأعمال الدولية وابرز الاهداف التي تتطمح لتحقيقها	أهمية وأهداف إدارة الأعمال الدولية	نظري مع حالات دراسية و مناقشة	مشاركات مع امتحان فصلي
3	2	التعرف على خصائص إدارة الأعمال الدولية وابرز القيود التي تواجهها	خصائص إدارة الأعمال الدولية	نظري مع حالات دراسية و مناقشة	مشاركات مع امتحان فصلي
4	2	التعرف على ابرز التحديات الداخلية والخارجية لإدارة الاعمال الدولية	تحديات إدارة الأعمال الدولية	نظري مع حالات دراسية و مناقشة	مشاركات مع امتحان فصلي
5	2	ادراك درجة عمق الشركة في مزاوله نشاط الأعمال الدولية ، والادوار التي تلعبها الفروع المحلية في الشركات عابرة الحدود	مستويات شركات إدارة الأعمال الدولية ونماذجها	نظري مع حالات دراسية و مناقشة	مشاركات مع امتحان فصلي
6	2	الامتحان 1 للفصل الأول		اختبار	
7	2	منظمة التجارة العالمية ودورها بقضايا إدارة الأعمال الدولية وابرز خصائصها	المنظمات الدولية وإدارة الأعمال الدولية - منظمة التجارة العالمية	نظري مع حالات دراسية و مناقشة	مشاركات مع امتحان فصلي

Academic program and course description guide

Course description form

1. Course name					
Bank management					
2. Course code					
3. Semester/year					
The first / 2025 2026					
4. The date this description was prepared					
Setmper2025					
5. Available forms of attendance					
In-person lectures					
6. Number of study hours (total)/number of units (total)					
Hour 45/3 units					
7. Name of the course administrator (if more than one name is mentioned)					
Name: Assistant Professor: Kamal Alwan Muhaisen					
Email: kalwa@uowasit.edu.iq					
8.Course objectives					
Objectives of the study subject		It is to identify the nature of the banking system and its basic role in the requirements of economic and social development			
1. Teaching and learning strategies					
The strategy		They are the strategies used by a faculty member to develop student teaching and learning, and they are plans that are followed to reach learning goals. That is, it describes curricular and extracurricular activities to achieve the learning outcomes of the program. With regard to bank management, it is to identify the nature of the banking system and its basic role in the requirements of economic development.			
2. Course structure					
the week	hours	Required learning outcomes	Name of the unit or topic	Learning method	Evaluation method
the first	3	An overview of banking management	Privacy of banking	Lecture and problem solving	Test and discuss
the second	3	central bank	The concept and characteristics of the central bank	Lecture and problem solving	Test and discuss
the third	3	Methods of allocating bank funds	Funds allocation method Funds pooled method	Lecture and problem solving	Test and discuss
the fourth	3	Commercial bank capital	The concept of business capital	Lecture and problem solving	Test and discuss

Fifth	3	Income statement and commercial bank balance sheet	Income statement/balance sheet	Lecture and problem solving	Test and discuss
Sixth	3		First month exam	Lecture and problem solving	Test and discuss
Seventh	3	First month exam	The concept of bank liquidity management and influencing factors	Lecture and problem solving	Test and discuss
Eighth	3	Bank liquidity management	The concept and nature of bank profits and evaluation of commercial bank profitability		
Ninth	3	Managing bank profitability	The concept and nature of risks facing banking	Lecture and problem solving	Test and discuss
The tenth	3	Bank risk management	The nature of bank deposits and how interest is calculated on deposits	Lecture and problem solving	Test and discuss
The tenth eleventh	3	The nature of bank deposits	An analytical study of the most important bank deposits	Lecture and problem solving	Test and discuss
twelveth	3	Analysis of bank deposits and factors affecting deposit attraction	The concept of bank credit and methods of repaying bank loans	Lecture and problem solving	Test and discuss
Thirteenth	3	Bank credit management	The concept of credit policy and what are the factors affecting credit policy	Lecture and problem solving	Test and discuss
fourteenth	3	Credit policy	The concept of credit risk and what are the types of risks facing banking	Lecture and problem solving	Test and discuss
Fifteenth	3	Credit risk	Horizontal and vertical analysis	Learning method	Test and discuss

3 .Course evaluation

The grade is distributed out of 100 according to the tasks assigned to the student, such as daily preparation, daily, oral, monthly and written exams, reports, etc., and is distributed as follows:

The pursuit score is 40, divided into 20 marks for daily exams and attendance, 10 for the first month's exam, and 10 for the second month's exam.

4. Learning and teaching resources

Required textbooks (methodology, if any)	Bank management and the privacy of banking Author: Abdel Salam Lafta Saeed
--	---

30 hours					
7. Course administrator's name (mention all, if more than one name)					
Name: Dr.Imad Yasir Hussein Email: ihussein@uowasit.edu.iq					
8. Course Objectives					
Course Objectives		- Teaching the student the general framework of business economics. - Students acquire skills in modern administrative methods. - Developing their administrative thinking through the use of economic concepts.			
9. Teaching and Learning Strategies					
Strategy		Applying microeconomic principles in the administrative decision-making process or providing analysis methods and tools in decision science including mathematical economics, econometrics, and statistics, to enable facility to achieve its goals with high efficiency.			
10. Course Structure					
Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
1	2		Basic concepts in business economics	Presence	Quiz+ Participation
2	2		Establishment theory and administrative decisions	Presence	Quiz+ Participation
3	2		Study and analyze demand	Presence	Quiz+ Participation
4	2		Demand forecasting	Presence	Quiz+ Participation
5	2		The theory of production, revenues and costs	Presence	Quiz+ Participation

6	2		Variable production function	Presence	Quiz+ Participation
7	2		the exam	Presence	Quiz+ Participation
8	2		Analysis of costs according to time period	Presence	Quiz+ Participation
9	2		equalize analysis	Presence	Quiz+ Participation
10	2		Analysis policies and administrative decisions	Presence	Quiz+ Participation
11	2		Profits	Presence	Quiz+ Participation
12	2		focus ,merger and integration	Presence	Quiz+ Participation
13	2		Control of commodity inventory	Presence	Quiz+ Participation
14	2		Benefits and costs on commodity inventory	Presence	Quiz+ Participation
15	2		the exam	Presence	Quiz+ Participation

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

The annual pursuit grade if the subject is theoretical is 40 marks			
10 marks	10 marks	20 marks	
First midterm exam	Second midterm exam	Homework , Quiz + Presence	
100 marks	60 marks	40 marks	
The final score	final exam	Mid1+mid2+HWs+quizes	

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	
Main references (sources)	Business economics (Prof. Dr. Muhammad Quraishi)
Recommended books and references (scientific journals, reports...)

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

8. Course Objectives	
Course Objectives	1. Teaching students the principles, concepts, objectives, uses and methods of cost accounting principles. 2. Teaching students the terminology of cost accounting, cost classifications and cost behavior. 3. Teaching students how to account for and control the cost element of materials in all its branches. 4. Teaching students how to control and account for the cost element of wages in all its branches. 5. Teaching students how to account for and control the indirect industrial costs element and methods of distributing them. 6. Teaching students how to determine the rates of charging indirect industrial costs and accounting procedures for them.
9. Teaching and Learning Strategies	

Strategy	- The learning strategy in this course focuses on: - Explaining the scientific material by presenting the theoretical and practical aspects, and how to employ the theoretical aspect in the practical application of cost accounting. - Writing reports, giving assignments, and participating in explaining the lecture inside the hall to develop students' skills. - Linking ideas to the branches of cost accounting and explaining their importance in providing information to decision makers with the institution.
-----------------	--

10. Course Structure

Week	Hours	Required Learning Outcomes	Unit or subject name	Learning method	Evaluation method
first	3	Understand principles, objectives, terminology of costs.	Theoretical framework of cost accounting	My presence	Quiz+ Participation
second	3	Understand the principle, objectives and terminology of costs.	Cost Elements	My presence	Quiz+ Participation
third	3	Understand how to account for and control the cost element materials.	Accounting and control of the cost element materials	My presence	Quiz+ Participation
fourth	3	Understand how to account for and control the cost element materials.	Accounting and control of the cost element materials	My presence	Quiz+ Participation
fifth	3	Understand how to account for and control the cost element materials.	Accounting and control of the cost element materials	My presence	Quiz+ Participation
sixth	3	Understand how to account for and control the cost element materials.	Accounting and control of the cost element materials	My presence	Quiz+ Participation
seventh	3		First exam	My presence	Quiz+ Participation
eighth	3	Understand how to account for and control the cost element of wages.	Accounting and control of the cost element	My presence	Quiz+ Participation
ninth	3	Understand how to account for and control the cost element of wages.	Accounting and control of the cost element	My presence	Quiz+ Participation
tenth	3	Understand how to account for and control the cost element of wages.	Accounting and control of the cost element	My presence	Quiz+ Participation
eleven	3	Understand how to account for and control the indirect manufacturing cost element	Accounting and control of indirect manufacturing costs	My presence	Quiz+ Participation

twelve	3	Understand how to account for and control the indirect manufacturing cost elements	Accounting and control of indirect manufacturing costs	My presence	Quiz+ Participation
Thirteenth	3	Understand how to account for and control the indirect manufacturing cost elements	Accounting and control of indirect manufacturing costs	My presence	Quiz+ Participation
Fourteenth	3	Understand how to account for and control the indirect manufacturing cost elements	Accounting and control of indirect manufacturing costs	My presence	Quiz+ Participation
Fifteenth	3		Second module exam	My presence	Quiz+ Participation

11. Course Evaluation

Distributing the score out of 100 according to the tasks assigned to the student such as daily preparation, daily oral, monthly, or written exams, reports etc

12. Learning and Teaching Resources

Required textbooks (curricular books, if any)	
Main references (sources)	Cost Accounting Book, by Professor Dr. Naseef Jass Al-Jabouri
Recommended books and references (scientific journals, reports...)

Academic Program and Course Description Guide

2024

Introduction:

The educational program is a well-planned set of courses that include procedures and experiences arranged in the form of an academic syllabus. Its main goal is to improve and build graduates' skills so they are ready for the job market. The program is reviewed and evaluated every year through internal or external audit procedures and programs like the External Examiner Program.

The academic program description is a short summary of the main features of the program and its courses. It shows what skills students are working to develop based on the program's goals. This description is very important because it is the main part of getting the program accredited, and it is written by the teaching staff together under the supervision of scientific committees in the scientific departments.

This guide, in its second version, includes a description of the academic program after updating the subjects and paragraphs of the previous guide in light of the updates and developments of the educational system in Iraq, which included the description of the academic program in its traditional form (annual, quarterly), as well as the adoption of the academic program description circulated according to the letter of the Department of Studies T 3/2906 on 3/5/2023 regarding the programs that adopt the Bologna Process as the basis for their work.

In this regard, we can only emphasize the importance of writing an academic programs and course description to ensure the proper functioning of the educational process.

Concepts and terminology:

Academic Program Description: The academic program description provides a brief summary of its vision, mission and objectives, including an accurate description of the targeted learning outcomes according to specific learning strategies.

Course Description: Provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the students to achieve, proving whether they have made the most of the available learning opportunities. It is derived from the program description.

Program Vision: An ambitious picture for the future of the academic program to be sophisticated, inspiring, stimulating, realistic and applicable.

Program Mission: Briefly outlines the objectives and activities necessary to achieve them and defines the program's development paths and directions.

Program Objectives: They are statements that describe what the academic program intends to achieve within a specific period of time and are measurable and observable.

Curriculum Structure: All courses / subjects included in the academic program according to the approved learning system (quarterly, annual, Bologna Process) whether it is a requirement (ministry, university, college and scientific department) with the number of credit hours.

Learning Outcomes: A compatible set of knowledge, skills and values acquired by students after the successful completion of the academic program and must determine the learning outcomes of each course in a way that achieves the objectives of the program.

Teaching and learning strategies: They are the strategies used by the faculty members to develop students' teaching and learning, and they are plans that are followed to reach the learning goals. They describe all classroom and extra-curricular activities to achieve the learning outcomes of the program.

1. Program Vision

Program vision is written here as stated in the university's catalogue and website.

2. Program Mission

Program mission is written here as stated in the university's catalogue and website.

3. Program Objectives

General statements describing what the program or institution intends to achieve.

4. Program Accreditation

Does the program have program accreditation? And from which agency?

5. Other external influences

Is there a sponsor for the program?

6. Program Structure

Program Structure	Number of Courses	Credit hours	Percentage	Reviews*
Institution Requirements				
College Requirements
